Fully Customisable

Standard roller tracks can be added to quickly build conveyors or live storage equipment. Castors can also be fitted to construct mobile equipment. A complete range of standard parts can be used that allows the user to construct exactly what's needed in a quick and very cost effective manner.

Flexible and Reuseable

All Connect-A-tube parts are re-usable time and time again meaning that the overall cost of ownership is reduced and new equipment can quickly be reassembled to suit the changing needs of your business.

Space Saving

Connect-A-tube is also a space saving product as bespoke equipment can be constructed to fit exactly where you want it to go. How many times have you had to settle for something that was either 'too big', 'too small', or 'almost right'. With Connect-A-tube you can build exactly what you need to do exactly the job you want it to do.

Connect A tube™

**Quickly Assembled,
Cost Effective
and Ergonomical.**

Product Overview

Should your manufacturing process change for any reason minor modifications can be carried out immediately. If a major process change is required all of the equipment can be deconstructed and reassembled to suit your new process. Ultimately nothing is wasted and new equipment, proto-types etc can be assembled and ready to test in just a few hours.

The graphic illustrations are just a few ideas of what can be made with Texam Connect-A-Tube®. Our design teams will be pleased to assist in the design of new equipment and ensure that everything is mechanically strong enough to do the job using some basic principles of proper construction.

FLOOR LOCK

ITEM	DESCRIPTION	WEIGHT PER PC	QUANTITY PER BOX
FL – 4040	floor lock, for use with 100mm dia, wheel	1.520 kg	8
FL – 4050	floor lock, for use with 125mm dia, wheel	1.540 kg	8
FL – 4060	floor lock, for use with 150mm dia, wheel	1.580 kg	8
FL – 4080	floor lock, for use with 200mm dia, wheel (on request)	1.620 kg	8

½ " THREAD			
ITEM	DESCRIPTION	WEIGHT PER PC	QUANTITY PER BOX
AD – 32 – WB	Adjustable foot, ½" thread, 32mm, metal base 70mm screw, 50mm thread	0.095 kg	300
AD – 32 – WC	Adjustable foot, ½" thread, 32mm, 100mm threaded length	0.110 kg	250
AD – 50 – WA	Adjustable foot, ½" thread, 50mm, metal base 70mm screw, 50mm thread	0.093 kg	200
AD – 50 – WB	Adjustable foot, ½" thread, 50mm, 100mm threaded length	0.130 kg	150
AD – 45	Adjustable foot, ½" thread, 45mm, metal base 50mm screw	0.100 kg	200
AD – 50 – RA	Adjustable foot, ½" thread, 50mm, 50mm threaded length, rubber pad	0.160 kg	120
AD – 50 – RB	Adjustable foot, ½" thread, 50mm, 100mm threaded length, rubber pad	0.175 kg	100

M12 THREAD			
ITEM	DESCRIPTION	WEIGHT PER PC	QUANTITY PER BOX
AD-32-WB –M	Adjustable foot, m12 thread, 32mm, metal base 70mm screw, 50mm thread	0.095 kg	300
AD-50-WA –M	Adjustable foot, m12 thread, 50mm, metal base 70mm screw, 50mm thread	0.115 kg	200
AD-45-M	Adjustable foot, m12 thread, 45mm, metal base 50mm screw	0.100 kg	200
AD-50-RA –M	Adjustable foot, m12 thread, 50mm, 50mm threaded length, rubber pad	0.150 kg	150
AD-50-RB –M	Adjustable foot, m12 thread, 50mm, 100mm threaded length, rubber pad	0.180 kg	100
AD-32-WC –M	Adjustable foot, m12 thread, 32mm, 100mm threaded length	0.157 kg	200
AD-50-WB –M	Adjustable foot, m12 thread, 50mm, 100mm threaded length	0.115 kg	200

CAPS				
	ITEM	DESCRIPTION	WEIGHT PER PC	QUANTITY PER BOX
	CAP-01-BK	Black plastic end cap, fits all pipes	0,003 KG	2500
	CAP-01-EB	ESD Black plastic end cap, fits all pipes	0,003 KG	2500
	CAP-03-IV	ivory plastic outer cap	0,007 KG	2500
	CAP-03-EB	Black plastic outer cap ESD	0,007 KG	2500
	CAP-07-SA	Steel end cap for 0,7mm plastic coated pipe	0,007 KG	1000
	CAP-07-SB	Steel end cap for 0,7mm stainless steel or powder coated pipe	0,007 KG	1000
	CAP-08-S	Steel end cap for 0,8 mm powder coated pipe	0,070 KG	1000
	CAP-10-S	Steel end cap for 1,0mm plastic coated pipe	0,007 KG	1000
	CAP-11-S	Steel end cap for 1,1mm stainless steel or powder coated pipe	0,007 KG	1000
	CAP-12-S	Steel end cap for 1,2mm stainless steel or powder coated pipe	0,007 KG	1000
	CAP-20-S	Steel end cap for 2,0mm plastic coated pipe	0,070 KG	1000

BUSHINGS				
	ITEM	DESCRIPTION	WEIGHT PER PC	QUANTITY PER BOX
	BS - 2807 - A	Bushing nut, M12-1/2" thread, for 0,7mm plastic coated	0,080 KG	300
	BS - 2807 - B	Bushing nut, M12 thread, for 0,7mm plastic coated pipe	0,080 KG	300
	BS - 2807 - D	Bushing nut, M12 thread, for 0,7mm stainless steel or powder coated pipe	0,095 KG	300
	BS - 2808 - A	Bushing nut, M12-1/2" thread, for 0,8mm powder coated pipe	0,083 KG	300
	BS - 2808 - B	Bushing nut, M12 thread, for 0,8mm powder coated pipe	0,083 KG	300
	BS - 2810 - A	Bushing nut, M12-1/2" thread, for 1,0mm plastic coated pipe	0,073 KG	300
	BS - 2810 - B	Bushing nut, M12 thread, for 1,0mm plastic coated pipe	0,073 KG	300
	BS - 2810 - F	Bushing nut, M12 thread, for 1,0mm pipe	0,083 KG	300
	BS - 2812 - A	Bushing nut, M12-1/2" thread, for 1,2mm stainless steel or powder coated pipe	0,077 KG	300
	BS - 2812 - B	Bushing nut, M12 thread, for 1,2mm stainless steel or powder coated pipe	0,077 KG	300
	BS - 2820 - A	Bushing nut, M12-1/2" thread, for 2,0mm pipe	0,065 KG	300
	BS - 2820 - B	Bushing nut, M12 thread, for 2,0mm pipe	0,065 KG	300

BOLTS				
	ITEM	DESCRIPTION	WEIGHT PER PC	QUANTITY PER BOX
	M0625	M6 bolt, 25mm long	0,007 KG	4000
	M0625L	M6 bolt, 25mm long, self locking	0,007 KG	4000
	M0610	M6 bolt, 10mm	0,004 KG	5000

● YE = YELLOW

BOLTS				
	ITEM	DESCRIPTION	WEIGHT PER PC	QUANTITY PER BOX
	M835 - Y	M8 bolt, 35mm long, yellow steel	0,017 KG	1000
	M840 - Y	M8 bolt, 40mm long, yellow steel	0,018 KG	1000
	M850 - Y	M8 bolt, 50mm long, yellow steel	0,021 KG	1000

SCREWS				
	ITEM	DESCRIPTION	WEIGHT PER PC	QUANTITY PER BOX
	SC - 1	self cutting screw, 3,5 x 13mm, x-head, for use with metal	0,002 KG	5000
	SC - 2	self cutting screw, 4,0 x 20mm, x-head, for use with metal	0,002 KG	5000

NUTS

	ITEM	DESCRIPTION	WEIGHT PER PC	QUANTITY PER BOX
	TN06	M6 T – nut	0,002 KG	10000
	TN06L	M6 T – nut, self locking	0,002 KG	10000

 YE = YELLOW

NUTS

	ITEM	DESCRIPTION	WEIGHT PER PC	QUANTITY PER BOX
	NN08 – Y	Nut, m8, yellow steel with nylon insert	0,005 KG	3000

WASHERS

	ITEM	DESCRIPTION	WEIGHT PER PC	QUANTITY PER BOX
	PW10 – Y	M10 Flat washer	0,002 KG	5000
	PW12 – Y	M12 Flat washer	0,002 KG	5000
	SW10 – Y	M10 Spring washer	0,002 KG	5000
	SW12 – Y	M12 Spring washer	0,002 KG	5000

Construction Guide

a product by:

TEXAM
design engineering

Using Connect-A-Tube

Good manufacturing ideas often evolve in to better ideas and so a process of continual improvement is required. Continual improvement requires using a product that is economic to use, quick to assemble, and easy to change. Connect-A-tube is an ideal product that allows manufacturers to do all of these things. If radical changes are required all equipment assembled using Connect-A-tube can be totally dismantled and reconfigured using the same parts time and time again.

Connect-A-tube is an ideal aid to manufacturing processes requiring workstations, carts and trolleys, packing stations, simple conveyor systems, flow racks etc. Although the product is very strong we recommend that the product is only used in manual loading and unloading operations. The system is not designed for the construction of heavy pallet type racking or anything that would be loaded with a fork lift truck.

Connect-A-tube is primarily designed to facilitate manual type operations where product handling can be reduced or made more ergonomically friendly.

www.connect-a-tube.com

Key Advantages

1. Simplicity

The product is simple to use and requires no special tools or technical design ability. In many cases operators themselves can use Connect-A-tube to solve their own materials handling issues and improve their working practices.

2.

Economical

Connect-A-tube is very economical to use. All of the pipes and joints can be deconstructed and reassembled to create new products time and time again. Designing new products is simple and only basic tools are required to assemble it. Connect-A-tube is also a very competitive product to use when compared to using aluminium profiles.

3. Space Saving and Ergonomics

Connect-A-tube is designed to provide users with the ability to construct products that maximise the use of space and are ergonomically designed to keep workers comfortable and safe.

4.

Flexibility

Connect-A-tube allows its users to create products that are totally flexible. It's easy to add new sections, integrate other options or simply disassemble and reassemble in to something completely different.

How do I calculate pipe sizes and lengths?

Desired overall length (1000mm) - (A(16.5mm) + B(35mm))2 = C Pipe length needed (897mm)

There are 2 basic methods that can be used to calculate the cut length of a required pipe:

Option 1

Calculating the required length of a pipe where the design is using the pipe centres as the required measurement.

Take the overall centre distance and subtract 70mm. In the example shown above the cut pipe length would be 897mm.

Option 2

Calculating the required length of a pipe where the design is using the overall width of the structure including any brackets as the required measurement.

Take the overall length or width of the structure to be assembled and subtract 103mm. In the example shown above the cut pipe length would again be 897mm.

Pipe Strength

Just like any other fabricated structure the overall strength and stability of any assembled piece of equipment depends on the design, components used and the build quality. Incorrectly assembled joints will not perform correctly and a lack of structural support will lead to poor stability. It is important to consider the weight that any assembled piece of equipment will need to support and whether or not the equipment will be permanently static or mobile.

The information below will help you to determine how many brackets and what supports will be necessary to construct a safe piece of working equipment based on the maximum loading that the pipes and joints will support.

X1 = 75Kgs Y = 85Kgs Using Plastic Coated Pipes
X1 = 60Kgs Y = 70Kgs Using Stainless Steel Pipes

X1 = 75Kgs X2 = 60Kgs Y = 85Kgs Using Plastic Coated Pipes
X1 = 30Kgs X2 = 30Kgs Y = 70Kgs Using Stainless Steel Pipes

Maximum Pipe Loadings

Distance Between Pipe Centres	Tube Wall Thickness 1.0mm	Tube Wall Thickness 2.0mm	Stainless Steel Tube 1.2mm
1.0m	68kgs	150kgs	68kgs
1.25m	55kgs	123kgs	55kgs
1.50m	46kgs	100kgs	46kgs
1.75m	39kgs	88kgs	39kgs
2.0m	34kgs	75kgs	34kgs
